TERMS OF REFERENCE

1. INTRODUCTION

The National Film and Video Foundation (NFVF) is an agency of the Department of Arts and Culture that was created to ensure the equitable growth of South Africa's film and video industry. We do this by providing funding for the development, production, marketing, and distribution of films and the training and development of filmmakers. In addition, the NFVF commissions research and produces industry statistics that provide stakeholders with valuable insights into the South African film industry.

The organization currently uses a manual performance management system and therefore seeks to procure a performance management system to improve the efficiency and effectiveness of the company's employee performance evaluation process. The new system aim to streamline the performance review process, provide real-time feedback, and allow for better data analysis. The goal is to create a more accurate, efficient, and fair performance evaluation process that will result in improved employee morale and higher productivity..

2. BUSINESS NEED

The current performance evaluation process is manual, time-consuming, and often inconsistent. The process is not only prone to errors but also lacks the ability to provide real- time feedback to employees due to its heavy reliance on shared spreadsheets being emailed back and forth. The manual process also creates a high workload for HR and management, and the lack of data analysis capabilities hinders the company's ability to make informed decisions about employee development and performance.

Acquiring a Performance Management System will address these issues by automating the performance evaluation process, providing real-time feedback, and offering advanced data analysis capabilities.

The NFVF goal is to integrate the new Performance Management System as the central HR hub for various employee-related functions, to transform the evaluation process from a cumbersome, error-prone task into a streamlined, data-driven approach that supports organizational growth and employee development and ensure that the performance evaluation process is consistent, objective, and transparent, leading to improved employee morale and higher productivity

3. SYSTEM DESCRIPTION

The NFVF requires an on-cloud Performance Management System that will cater for an end-to end integrated solution for all employee and employer-related information and performance processes and records. The NFVF has a staff complement of around 70 employees, including those in filled positions and those with future expansion plans. The system is, therefore, required to cater to and manage performance in line with the organization's annual performance plans and targets for all employees.

Key Capabilities for the NFVF Integrated HR Hub:

3.1. Employee Profiles:

- i. **Comprehensive Profiles:** The system must allow for the capture and storage of detailed information, including personal details, job history, contact information, and organizational roles. The roles will allow employees to be linked to managers for the workflow process.
- ii. **Document Management:** Keep up-to-date personal documentation such as ID cards, certifications, and background checks. The system must allow for uploads and storage of employee documentation.

3.2. Performance Reviews:

a) Goal Management

- i. A Goal management software tool to set, track, and manage the achievement of goals. It must allow employees to create clear goals, monitor progress, and see how well they are doing.
- ii. Set key result areas (KRAs), skillsets, and competencies.
- iii. When goals are set, they must be sent to the Managers queue for approval.
- iv. Once approved the goals must be fixed for the quarter and align to the annual goals.
- v. There must also be additional fixed company values that employees get rated against and sections for financial and customer service goals.

b) Review Management

- i. When goals are set, the review timelines need to start.
- ii. The system must allow for monthly reminders and a calendar to schedule monthly meetings that tracks employee performance.
- iii. Add self-assessment forms for the employee to conduct a self-assessment.
- iv. Must have the capability to provide feedback on the system for all review meetings.
- v. Implement a real-time live progress dashboard to help managers and HR ensure the timely completion of the reviews.
- vi. The Manager must get a view of all employees and the status of where they are in the review process and outstanding reviews.
- vii. **Request Feedback:** Provide 1:1 feedback.
- viii. **Review History:** Maintain records of past performance evaluations, feedback, and ratings.
- ix. **Goal Tracking:** Track progress towards individual and team goals and link performance reviews to specific achievements or milestones.
- x. **Feedback Mechanisms:**
 - **Real-Time Feedback:** Capture 360-degree feedback form from direct reports, peers, and multiple managers to the review cycle if required where employees work with cross functional teams.
 - This feature helps managers consider different perspectives and evaluate employee performance without bias. The necessary parties can select the peers and subordinates who will evaluate an employee's performance. Those selected will then be able to provide their feedback about the employee. Reviewers can access this feedback through the system itself.

3.3. Analytics and Reporting:

- i. **Performance Metrics:** Analyse performance data to identify trends, gaps, and areas for improvement.
- ii. **Training Effectiveness:** Evaluate the impact of training programs on performance outcomes.

3.4. Compliance and Security:

- i. **Data Protection:** Ensure that employee information is securely stored and protected in compliance with data protection regulations.
- ii. **Access Controls:** Define who can access and modify different types of information to maintain confidentiality and integrity.

3.5. Training Programs:

- i. **Training Records:** Document completed training sessions, certifications, and development courses.
- ii. **Development Plans:** Integrate learning and development goals with performance management, providing recommendations for future training based on performance and career aspirations.

3.6. Integration with Other HR Functions:

- i. **Payroll and Benefits:** Sync with payroll systems to align performance-related compensation adjustments.
- ii. **Recruitment:** Integrate with recruitment tools to align new hires' onboarding with performance management processes.

3.7. User Experience:

- i. **Unified Interface:** Provide a single, user-friendly platform where employees and managers can access all necessary information and tools.
- ii. **Self-Service Options:** Allows employees and managers to update their own profiles, update goals, track progress, view training, access feedback reports and submit feedback directly through the system, reducing the administrative burden on HR and management.

3.8. Customization:

- i. **Tailored Processes:** Adapt the system to fit organizational needs and industry specific requirements.
- ii. **Configurable Workflows:** Allow for customizable performance review cycles, training modules, and feedback processes.

3.9. Communication Tools:

- i. **Collaboration Features:** Include tools for messaging, scheduling meeting reminders for deadlines, and automated notifications to keep the process on track.
- ii. Sharing documents related to performance management.
- iii. Allow for ongoing feedback rather than waiting for periodic reviews, enabling employees to receive timely insights and make adjustments as needed.

3.10. Data Accuracy and Integrity:

- i. **Centralized Data:** Stores all performance-related data in one secure system, eliminating the risk of errors associated with manually handling and transferring data through spreadsheets.
- ii. **Version Control:** Manages different versions of performance documents and feedback, ensuring that the most current information is used.

3.11. Advanced Data Analysis:

- i. **Analytics and Reporting:** Offers robust data analysis capabilities to generate reports on individual and team performance, identify trends, and make data-driven decisions about employee development and organizational strategies.
- ii. **Performance Metrics:** Provides insights into performance patterns, training effectiveness, and areas requiring improvement, enabling more informed strategic planning.

4. SUPPORT AND MAINTAINANCE

- Ensure access to the Performance Management System and maintain its functionality.
- Provide continued support to NFVF users on the Performance Management System when requested.

The necessary parties can select the peers and subordinates to evaluate an employee's performance. Those selected will then be able to provide their feedback about the employee. Reviewers can access this feedback through the system itself.
- Confidentiality - the new system will securely keep staff members' confidential information and help management track various aspects of staff development, such as courses attended, further studies, etc.
- Performance reports – The system should be able to generate reports of each employee's performance.
